LinkedIn GitHub LeetCode Hackerrank GeeksforGeeks CodeChef

## Professional Summary

Software Engineer skilled in Java, Full-Stack Development, and AI/ML, with proven problem-solving expertise.

## Education

- **B.Tech in CSE**, Velagapudi Ramakrishna Siddhartha Engineering College (2023–2027) — CGPA: 9.24/10
- **Intermediate**, Dr. BJSR Junior College, Badvel (2021–2023) — 98.7%
- **Secondary Education**, Sri Chaitanya Techno School (2020–2021) — 99.2%

## Experience

**Software Development Engineering Intern** – Amazon *May – July 2025*

- Built GDPR-compliant data enrichment pipeline for 300+ Amazon BankAccounts.
- Developed AWS Lambda functions integrating SQS, SNS, DynamoDB, S3.
- Managed AWS infrastructure with CDK/TypeScript, added monitoring via CloudWatch.

**Google AI-ML Virtual Internship** *Oct - Dec 2024*

Eduskills, AICTE, and Google for Developers

- Built AI models for classification and text analysis using Python.
- Applied Google AI Vision for automated image analysis, achieving 99% accuracy.
- Gained hands-on experience with TensorFlow and OpenCV in real-world projects.

## Skills Summary

- **Programming:** Java, Python, C, C#, JavaScript
- **Development:** HTML, CSS, React.js, Node.js, Unity, Drone Technologies
- **AI/ML:**TensorFlow,OpenCV,NumPy,Generative AI,LLM Integration,AI Agent Development(n8n)
- **Databases:** MySQL, PostgreSQL
- **Cloud & Tools:** AWS, Azure, Git, GitHub, VS Code, IntelliJ
- **CSE Coursework:** DSA, OOP, OS, DBMS, CN, Cloud Computing

## Projects

- **Autism Prediction System** GitHub Link
  - Built **ML models** (Random Forest, Logistic Regression, XGBoost) to predict Autism Spectrum Disorder from questionnaire data.
  - Deployed a **FastAPI backend** with real-time predictions, achieving $<$ **200ms** latency.
  - Developed a **React + TailwindCSS frontend** with dynamic forms and probability-based visualization.
- **Face-Recognition Attendance System** GitHub Link
  - Developed an **AI-powered system** for real-time attendance tracking using face recognition.
  - Integrated **OpenCV** for image processing and **TensorFlow** for model training.
  - Deployed a user-friendly interface reducing manual effort by 80%.
- **Java Subscription Platform** GitHub Link
  - Engineered a **Java-based platform** to streamline course subscriptions, enabling real-time seat tracking.
  - Optimized enrollment workflows by designing a scalable **file handling system**, handling **500+ files/day**.
  - Applied **OOP, file I/O, and data processing** principles to deliver a production-ready solution.
- **CampusSync** GitHub Link
  - Built a **full-stack event management platform** (PHP, MySQL) reducing manual work by **60%**.
  - Created a **responsive dashboard** (Bootstrap, Now UI) for scheduling/tracking **200+ students**.
  - Streamlined **database workflows** with secure access, achieving **99% uptime**.

## Certifications

- **Programming Essentials in C, Python, and Cybersecurity Fundamentals** Cisco
- **R Software Certification**. NPTEL
- **API Fundamentals Expert**. Postman

## Achievements

- **Amazon AFE-FFE Scholar-**Selected among 15000+ applicants for a prestigious scholarship program.
- **Microsoft Learn Student Ambassador( Beta)-**Led events that boosted engagement by 80%.
- **AP EAPCET Rank 3997 (Top 2%)-**Out of 200,000+ candidates.
- **Hackathons-**Contributed to national hackathons contributing to team innovation & collaboration.
